LEAD REDUCTION TEST REPORT

Report # 16-101-Lead Reduction Test (Gravity Black Berkey Filter).
 Customer Name: New Millennium Concepts, Ltd.
 Report Date: 04/18/2016.

EXECUTIVE SUMMARY

Two hundred gallons of tap water was spiked with Lead Standard Solution to have a final concentration of 1000 ± 100 $\mu\text{g/L}$, the spiked tap water was filtered through the filter element and tested; the Lead Standard Solution in the tap water was reduced by at least 99.0%.

INTRODUCTION

Two hundred gallons of tap water was spiked with Lead Standard Solution to have a final concentration of Lead of 1000 ± 100 $\mu\text{g/L}$, the spiked tap water was filtered through the filter element, the spiked solution and the filtered solution were tested following the EPA method 200.9; the Lead Standard Solution in the tap water was reduced by at least 99.0%.

REAGENTS AND LAB EQUIPMENT

Gravity Black Berkey Filter.
 Lead Standard Solution Inorganic Ventures Catalog # CPB.
 Atomic Absorption Spectrometer, Perkin Elmer SIMAA 6000.
 Type A glassware necessary to perform the EPA 200.9 method for drinking water analysis.

PROCEDURE

Two hundred gallons of tap water was spiked with Lead Standard Solution in a Tank and mixed well; this solution was tested and adjusted to have a final concentration of 1000 ± 100 $\mu\text{g/L}$ of Lead, the results are summarized in Table 1, and 3 below. The solution was filtered through the Black Berkey Filter and tested following the EPA method 200.9. The results are summarized in Table 2, and 4 below.
